BOLZ INTEC drum repair instead of new purchase

A repair is resource-saving and often cheaper than a new purchase. Our drum repair includes surfaces repairs such as e.g. bulging, grinding, welding and much more. We are looking forward to your inquiry.

Please send us a photo in advance with the required details of repair or send us your cleaned drum with consignment note for secondary materials (if required).

We check the damage for free and prepare you an offer. Alternatively we also repair the damage directly at the expense per barrel.

Type of repair desired

- ☐ Bulging
- ☐ Grinding (e.g. scratches)
- ☐ Welding (e.g. new border, new bottom)
- ☐ _____

State of repair

- ☐ As good as new
- ☐ Essential repairs
- ☐ Rough repair
- ☐ _____

Do you have several drums for repair?

For larger quantities we create a cost-effective pattern repair which will be credited in a following order.
