

STERILE FILL/FINISH

PARTSWASHING RACKS & ACCESSORIES

teg

TEG custom design and manufacture each partswasher & autoclave accessory to match your machine and your loads.

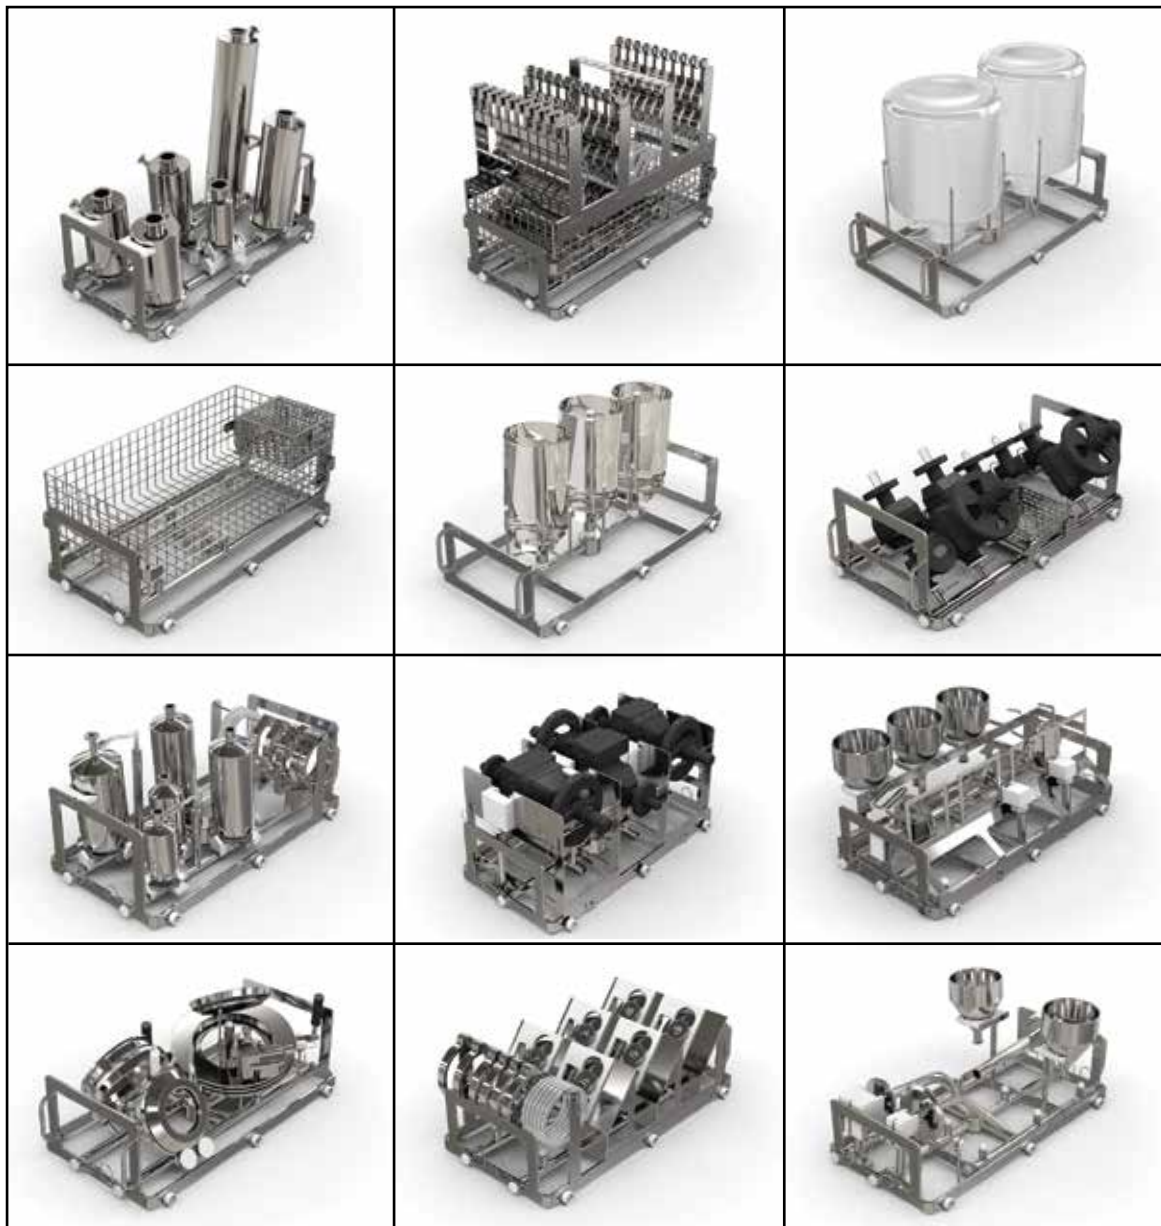

Designed, Manufactured in only 6 weeks.

TEG uses the latest in metrology and design technology to ensure that your custom made accessories work first time. Each component to be washed or sterilised is 3D scanned on your site. From this our team of design engineers work with you to orientate and position all of your parts to streamline your component preparation process.

TEG custom racks can support:

- Filter Housings (Various Sizes)
- Carboys (Plastic/Glass)
- ITT Valves
- Funnels, J-Tubes & Dip Tubes
- Triclamps, Gaskets and blanks
- Miscellaneous small parts (Baskets)
- Block Valves

BENEFITS OF WORKING WITH TEG

- Fast Delivery
- Validation Support Documentation With Every Order
- 24x7 Technical Support
- 24 Hour Spare Part Supply*
